

WEB USERS 2023

Hello!

The SOS-Attendance Observatory is a study and research centre for school attendance problems. This observatory aims to provide reports and research on school attendance problems and, based on the results achieved, in the coming years to offer free training activities to prevent and deal with school attendance problems, as well as to promote awareness campaigns to improve regular school attendance.

The creation of this Observatory is co-funded by the European Commission through the Erasmus+ Programme [2022-1-ES01-KA220-SCH-000088733]. To disseminate the purpose of this project and its main findings, the SOS-Attendance Observatory website has been created as the main means of disseminating the products of this project (see website [here](#)).

Given the importance of providing a quality website, we need to listen your opinion about this website. Please, visit the [website](#) and then fill in the following [evaluation survey](#) on this platform. It only takes a few minutes to complete.

Thank you in advance.

The SOS-Attendance Observatory team.
